

利金湯

Gui Jian Yu

Wild Crafted Herb

GUIJIANYU

TRADITIONAL GROWING LOCATION

Sichuan Province, China (wild-crafted)

Herbs that Protect the Yang by Clearing Inflammation/Gu Toxicity

Bitter, cold, and non-toxic.

Good for blood stasis caused by external injuries and menstrual stagnation. Modern research adds an anti-tumor effect and the lowering of blood sugar. Used much for deep seated recalcitrant infections affecting the nervous system, such as Lyme disease, fibromyalgia, chronic fatigue syndrome and other mystery syndromes has sent researchers into the rain forests of the world in search for potential cures. The renaissance of this herb is the result of a decade-long research project that first identified a range of “anti-Gu” substances in the classic materia medica, and then determined through clinical usage which one of these are appropriate and safe to use in a modern clinical context. In this process, Guijianyu was identified as one of the best broad-spectrum anti-toxin herbs with an anti-pathogenic function that can be compared to Qinghao.

Gu Syndrome (“Possession Caused by Parasitism”), malaria, venereal disease, toxic skin eruptions, or chronic body pain caused by recalcitrant pathogens. China’s earliest materia medica, the Shen Nong bencao jing, also called this herb Weimao (Spear of Protection) and characterized it as a bitter, cold, and non-toxic substance. The classic further described Guijianyu as a medicinal that can purge blood stasis caused by external injuries and menstrual stagnation. Modern research adds an anti-tumor effect and the lowering of blood sugar to the list of therapeutic functions.

Although ancient texts value Guijianyu for its anti-toxin effect, the herb appears to have become one of the casualties of the modern process of Chinese medicine standardization, in which all references to the profession’s shamanic past have been systematically purged from the face of TCM by the Chinese government. In addition, the plant grows only in the wild and is therefore extremely hard to find on Chinese herb markets.

The FDA requires the following statement:

These products have not been evaluated by the Food and Drug Administration. Please note that our products are formulated according to classical Chinese alchemical principles. References to modern disease names in this presentation are intended to convey a general idea of how these classical principles might be applied in a modern clinical context. This should not be understood as a claim on our part that the Classical Pearls products treat, cure, or prevent these conditions.
